

National Kaohsiung Normal University, NKNU

Both awarded funding and accredited as an institution pursuing "excellence in teaching"

NKNU is proud of its highly efficient faculty and staff who are dedicated to the enrichment of the campus. The values of "service," "excellence," "efficiency," "humanity," and "digitalization" are stressed among all levels of administration. It is through these values that the University is able to remain a first-rate academic environment where both research and instruction can thrive. NKNU has also won nationwide acclaims for its efforts and scholarly pursuits. In 2004, the University was accredited by the Ministry of Education as an "excellent" institution, ranking it as one of the best universities in the nation. With a vision directed to the future, NKNU's faculty and students help build a community that is based on heritage and innovation, striving to diversify and expand the University's status across the world. With their endeavors, NKNU has become an institution that is attuned toward globalization, equality, and environmentalism.
