

### **National Yang-Ming University**

*NYMU, excellent research and education in Biomedical Science and Engineering.*

Founded in 1974, National Yang-Ming University has been adhering to the school motto of "benevolent mind and art, putting knowledge into practice" while training excellent humane doctors to provide service by solving medical problems in remote and rural areas. In order to cultivate a new generation of professional medical talents, we began to expand our disciplines into biomedicine. In 1994, we were promoted to "National Yang-Ming University" and became the first medicine-oriented comprehensive university in Taiwan.

In the area of research, we have been awarded the Program for Promoting Academic Excellence of Universities for results in our top two research fields of Genetics and Brain Research. Additionally, we have recently been accredited as a research university by the Ministry of Education. Moreover, according to Academia Sinica 2005, we are ranked top in both the quality and quantity of research publications, as well as average faculty productivity among all universities in Taiwan.

#### **Medical:**

1. International Health Program for Master's program
2. International Health Program for Doctoral Program
3. Interdisciplinary Neuroscience Ph.D. Degree Program for Doctoral Program
4. International Ph.D. Program in Photonics for Doctoral Program
