

Mahidol University, Thailand

A truly comprehensive, international and distinguished public institution

Mahidol University's origins date back over 120 years to the founding of Thailand's first hospital and medical school. After becoming the University of Medical Sciences in 1943, the university was subsequently renamed Mahidol University in 1969 by H.M. King Bhumibol Adulyadej after his father, H.R.H Prince Mahidol of Songkla, who is regarded the "Father of Modern Medicine and Public Health in Thailand". Since this time, Mahidol University has continued to grow and diversify to become the multi-disciplinary institution it is today offering expertise in science, medicine, engineering, arts and humanities, social science, business, languages, music and fine and applied arts. It is now one of the region's top universities, and is internationally renowned for the high caliber of its teaching, research, and healthcare. With almost 50% of its degree programs being international, the university is also Thailand's leading advocate of the internationalization of higher education.
